Developing Data Products
Week 3 Project

Marcel Fratz

8/1/2021

Introduction

In this project is the goal to create a web page presentation using R Markdown that features a plot created with Plotly.
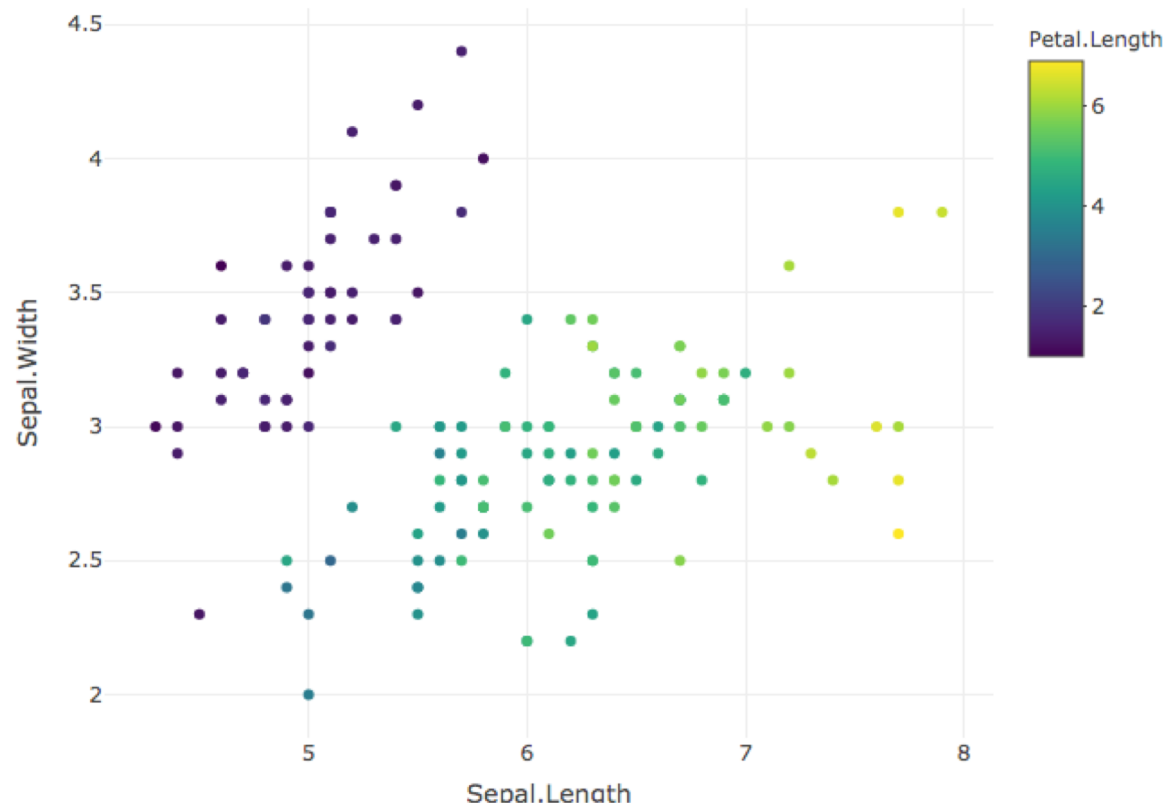

Code in R & Plot

```r
# Loading dataset

data("iris")

library(plotly)

plot_ly(iris, x = ~Sepal.Length, y = ~Sepal.Width, type =
"scatter", mode = "markers", color = ~Petal.Length)
```

Thanks for the attention
